

Safeguard Your Patients' Surgery

Leukomed[®] Control

- Transparent composition which enables direct wound surveillance
- Bacterial and waterproof barrier
- Wear time up to 14 days for undisturbed wound healing*

Leukoplast[®]

Wound care in best hands

Effectiveness proven in clinical evidence:

Indications

- Leukomed® Control is indicated for dry and low exuding acute wounds such as surgical incisions, superficial partial thickness burns, donor sites, lacerations and abrasions.
- Recommendation: Well suited for the monitoring of wounds on patients with an increased risk of infection.

Wear time up to **14 days***

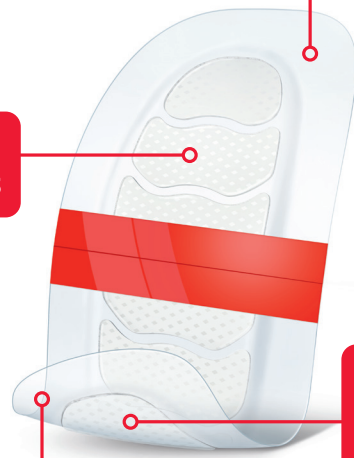

Enables **direct wound surveillance** without potential disruption to the wound and post-operative healing process**

Ultra-thin and conformable film for a second skin feeling

Thin, absorbent hydropolymer pads

Bacterial and waterproof barrier

Completely transparent composition

Clear wound visibility**

Enables early detection of complications

Secure bacteria-proof barrier*
